Projects

Education Website | React

Mar 2024

- Developed a responsive and user-friendly education website using **React** for the frontend. The site showcases key college/program information, campus features, testimonials, and more. Implemented dynamic components for smooth user interaction and ensured mobile responsiveness. Integrated **Google Web3 Forms** to handle form submissions securely and efficiently without a backend.
- Key Technologies:** React, HTML, CSS, Google Web3 Forms, Responsive Design

User Login System (Backend Only) | Node.js, Express, MongoDB

Jan 2025

- Developed a backend-only login and registration system using Node.js, Express.js, and MongoDB. Passwords were securely hashed using bcrypt before being stored in the database. JWT was implemented for authentication, with middleware to verify tokens and protect routes. User data was structured using Mongoose schemas, and all API endpoints were tested using Postman.
- Key Technologies:** Node.js, Express.js, MongoDB, JWT, Bcrypt

Personal Portfolio Website | React & Tailwind CSS

Aug 2024

- Designed and developed a fully responsive personal portfolio website using React.js and Tailwind CSS. Showcases key projects, technical skills, and contact information with smooth UI interactions and animations. Emphasized clean design, performance optimization, and mobile-first responsiveness. Deployed using Vercel.
- Key Technologies:** React, Tailwind CSS
